Fund information

Investment in mutual funds **is not** a money deposit.

What are you investing in?

- **Investment Policy**

- Invest both onshore and offshore in debt instruments and/or deposits or deposits equivalent issued, certified, avalized, or repayment guaranteed by the government, a state enterprise, a financial institution, and/or private entity, where such instruments are designated as investment grade in either the issue rating category or the issuer rating category.
- The fund may invest no more than 20% of fund assets in non-investment grade debt securities or unrated securities.
- The fund may invest no more than 100% of fund assets in units of mutual funds under management of the Management Company in accordance with the criteria set by the SEC.

- **Management Style**

Aim for better returns over the fund's benchmark (Active Management)

Who is the fund suitable for?

- Investors who expect higher return than deposits and can accept possible lower return than investment in stocks.
- Investors who look for tax benefits. Investors are required to maintain their investment in this fund for a period of time as specified by the Revenue Department in order to be eligible for tax benefits granted to investment in retirement mutual funds.

This fund **is not suitable for:**

- Investors who prefer fixed rate of return or preserve full amount of principal.
- Investors who prefer to invest only in high quality, high liquidity and low price fluctuation of debt instruments. The investable assets and restrictions of money market fund is not applied to this fund.

For further clarification on this investment policy and potential risks, what should you do?

- **Read** the full prospectus or **seek** advice from the management company or its appointed selling agents.

Unless you have full grasp in the nature of risks, it is advisable you should refrain from investment in this fund.

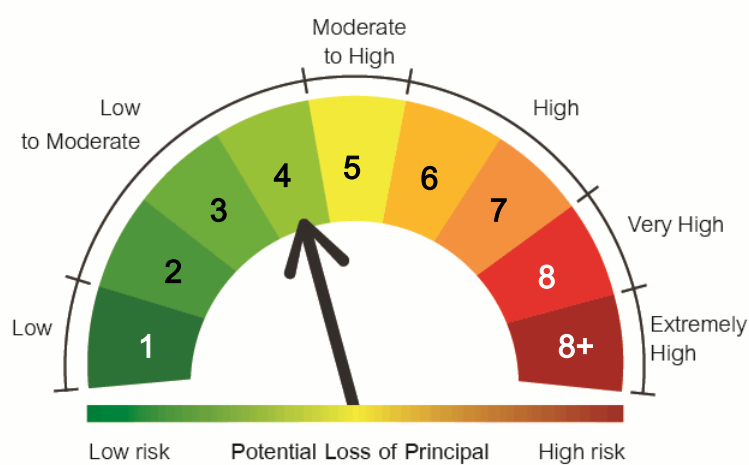

What are the key risks of the Fund?

• Important Risk Warnings

- The fund is not restricted by the requirement to invest only in low risk instruments like the money market funds. This means it may contain higher risks than money market fund.
- The fund may invest in illiquid debt instruments which may not be able to be traded in a timely manner or at appropriate prices.
- Investors should study information on investment in RMF and find more information at the full prospectus or tax guideline.
- Investors may not pledge, sell, dispose of or use the units as collateral.
- In the case where there is a tendency that more than two-thirds of the total mutual fund units sold are to be redeemed, the Management Company may dissolve the fund at its discretion and may cancel the redemption orders it has already received or stop accepting such orders.

Risk Spectrum of the Fund

Key Risks

1. Credit risk of debt instrument issuers

	Low Risk		High Risk		
National credit rating	Gov.bond/AAA	AA, A	BBB	Below BBB	unrated
International credit rating	AAA	AA, A	BBB	Below BBB	unrated

Remark: Major credit ratings of the fund as highlighted in credit rating box(es) mean that this fund invested more than or equal to 20% of NAV in securities with those credit.

2. Market risk

	Low Risk				High Risk
Portfolio Duration as of 31 August, 2020 is 3.12 years	< 3 months	3 months - 1 year	1 - 3 years	3 - 5 years	> 5 years

	Low Risk				High Risk
Standard Deviation (SD)	< 5%	5-10%	10 - 15%	15 - 25%	> 25%

*Standard Deviation (SD) is calculated from the last 5 years (or since launch for the fund launched within that period)

3. Exchange rate risk

	Low Risk				High Risk
FX Hedging	Fully/Almost fully hedge	Partially	At discretion	No hedging	

Remark: The fund will enter into a forward contract to hedge against the exchange rate risk at least of 90% of the foreign investment value.

4. High concentration risk

	Low Risk				High Risk
Issuer concentration risk	≤ 10%	10-20%	20-50%	50-80%	> 80%

	Low Risk				High Risk
Sector concentration risk	≤ 20%	20-50%	50-80%	> 80%	

Remark: This fund has concentration investment in Finance & Securities

	Low Risk				High Risk
Country concentration risk	≤ 20%	20-50%	50-80%	> 80%	

Remark: This fund has no concentration investment in any countries more than 20% in their portfolio.

For more information, please study an example on the last page.

Fund performance

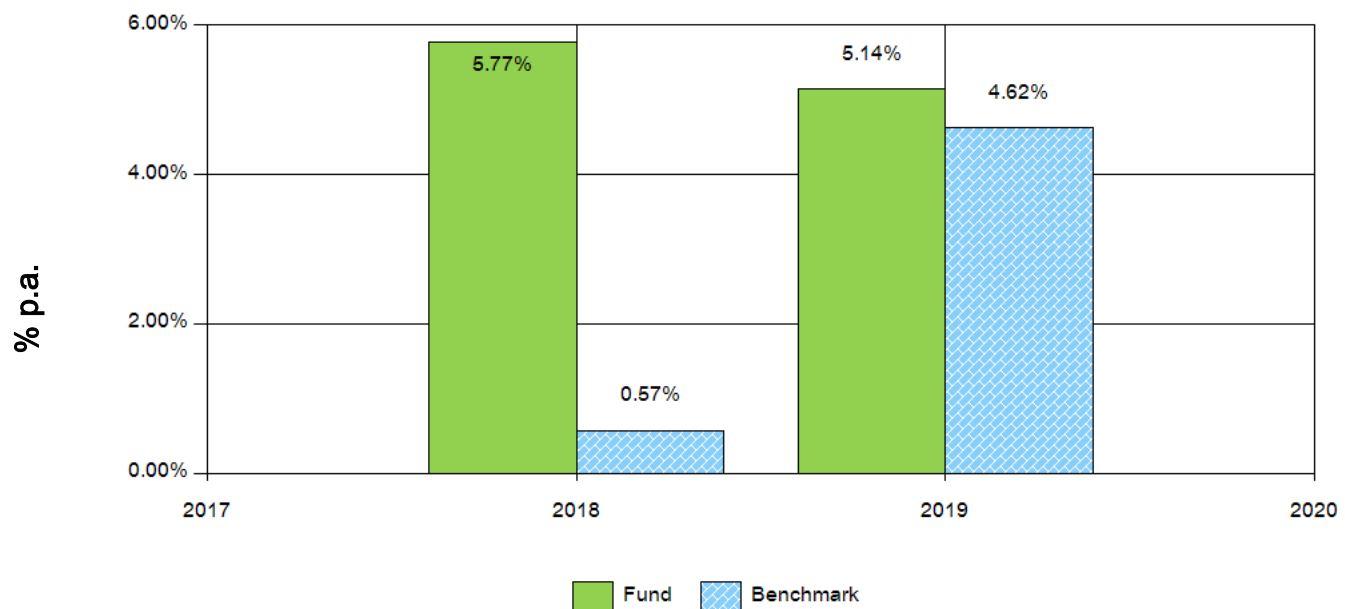

Past performance is not a guarantee of future performance

1. Benchmark

Benchmark is weighted average as follows;

- (1) 50% TBMA Government Bond Index with being less than 10 years
- (2) 30% TBMA Corporate Bond Index (MTM) of BBB+ or above with being more than 1 year but not exceed 3 years
- (3) 10% The average interest rate 1 year fixed deposit of 1 MB in individual-type a/c of BBL, KBank and SCB
- (4) 10% THBFIX 6 Months

2. Calendar year performance

* For the year when the fund incepted, the calendar year performance is the cumulative return from an inception date to year end.

3. Maximum drawdown of the investment in the last five years :-2.44 %

(*Or since launch for the fund launched within that period)

4. Standard deviation of the fund performance : 1.55 % p.a.

(SD is calculated from the last 5 years or since launch for the fund launched within that period)

5. Tracking error : N/A

6. Fund category based on peer group fund performance : Mid Term General Bond

7.Fund performance (%)

Disclaimer

- Investment in Mutual Fund is not a form of saving and not protected by Deposit Protection Agency. Therefore, investment in Mutual Fund involves risk including possible loss of the principal amount invested.
- The fund is approved by The office of the SEC.
- The draft prospectus for KFAFIXRMF does not indicate that The office of the SEC has certified the accuracy of the information contained in the prospectus nor guaranteed the price or return on investment for such fund. The Management Company has reviewed the information in this summary prospectus as at 31 August, 2020 with professional care as the party responsible for the management of the fund and certifies that the above information is correct, true and not misleading.
- In case of investment in units of a mutual fund under the management of the company (cross-investment fund), the Management Company shall not double charge a management fee to an Invested fund. For example, if an Investing fund has 1,000 million Baht in NAV and invests its 100 million Baht in an Invested fund, the Management Company will charge a management fee on (1) the 900 million Baht investment at the rate specified by an Investing fund; and (2) the 100 million Baht at the rate specified by an Invested fund.
- In case of investment in units of a mutual fund under the management of the company (cross-investment fund), the Management Company shall not double charge a front-end fee and/or back-end fee to an Invested fund. For example, if an Investing fund has 1,000 million Baht in NAV and invests its 100 million Baht in an Invested fund, the Management Company will charge a front-end fee and/or back-end fee on the 1,000 million Baht only at the rate specified by an Investing fund and charge no front-end fee and/or back-end fee to an Invested fund.

Disclaimer of Peer Group Fund Performance

1. Past performance does not guarantee future results.
2. More details information about fund performance can be obtained via AIMC website www.aimc.or.th
3. Peer group comparison can be obtained at point of sale. It is used to measure the performance of mutual funds under the same category by percentiles which divide the set of data into 100 equal parts and rank from lowest to highest.
 - 5th Percentile (Top 5% performance)
 - 25th Percentile (Top 25% performance)
 - 50th Percentile (Median performance)
 - 75th Percentile (Bottom 25% performance)
 - 95th Percentile (Bottom 5% performance)
4. Fund returns are annualized for periods longer than one year.

Detailed Explanation of Disclosures in the Prospectus

The information disclosed below is a summary of risk dimensions.

Topic	Disclosure																																																																
1	<p data-bbox="413 271 1549 405">Credit Risk is expressed in terms of credit rating which indicates the likelihood of counterparty's meeting its obligations, and assessed using the historical performance, and financial position of the issuer. 	Topic	Disclosure																										
3	Currency Risk	<p>Currency Risk is the possibility that changes in exchange rate will affect the value of investment units. For example, if a mutual fund invests in securities denominated in US Dollar during Thai Baht depreciation and the units are subsequently sold when Thai Baht appreciates, the mutual fund will receive lower return in Thai Baht. On the other hand, if the same fund invests in securities denominated in US Dollar during Thai Baht appreciation and the units are subsequently sold when Thai Baht depreciates, the mutual fund will receive higher return in Thai Baht. Therefore, currency hedging techniques as follows are key tools to manage such risk.</p> <table border="1" data-bbox="416 409 1536 506"> <tr> <td colspan="7">Currency risk is assessed based on the exchange rate hedging policy of the fund.</td> </tr> <tr> <td></td> <td>Low</td> <td></td> <td></td> <td></td> <td></td> <td>High</td> </tr> <tr> <td>FX hedging</td> <td></td> <td>Fully / Almost fully hedged</td> <td>Partially</td> <td>At discretion</td> <td>No hedging</td> <td></td> </tr> </table> <ul style="list-style-type: none"> • Fully / Almost fully hedged: Investors have no exposure to currency risk. • Partially-hedged with fixed ratio: Investors may be exposed to certain level of currency risk. • Hedging at discretion of the fund manager: Investors may be exposed to currency risk because it is the discretion of the fund manager whether to use a currency hedging technique. • No hedging: Investors are exposed to currency risk. 5	Maximum Drawdown	<p>Maximum drawdown means an accumulated loss as a result of the investment in the past five years from the reporting date (or since inception if the fund has been established for less than five years). It is calculated as follows:</p>																										

	Topic	Disclosure
		$\text{Drawdown}_{(t)} = \frac{\text{Unit value}_{(t)} - \text{Highest unit value}^*}{\text{Highest unit value}^*}$ $\text{Maximum Drawdown} = \min (\text{Drawdown}(t))$ <p>Remark: * Highest unit value means the highest value of unit in the preceding period up to the calculation date (t).</p>
6	Standard Deviation	<p>Standard Deviation (SD) of Fund measures the volatility the fund's returns, using the calculation as prescribed by Association of Investment Management Companies re: Standard for Measurement and Presentation of Performance of the Mutual Funds. SD expresses the historical performance in annual percentage for the five years preceding the reporting date.</p>
7	Tracking Error	<p>Tracking Error (TE) is the difference between a mutual fund portfolio's returns and the benchmark index it was designed to copy. This indicates how well the mutual fund is performing against the benchmark index and shows how much the mutual fund deviates from the benchmark index. For example, if the mutual has a low TE, this means the fund has slightly deviated from the benchmark index and therefore the fund is efficient in copying the benchmark index. On the other hand, if the mutual has a high TE, this means the fund has substantially deviated from the benchmark index and therefore it is unlikely that the fund will achieve return at similar rate to the benchmark index.</p> <p>TE is used for tracking error of passive funds/ index tracking such as index fund or ETF.</p>
8	Portfolio Turnover Ratio	<p>Portfolio Turnover Ratio (PTR) is the percentage of a mutual fund or other investment's holdings that have been replaced in a given year which can better reflect the investment strategies employed by the fund manager. It is calculated by taking either the total amount of new securities purchased or the amount of securities sold - whichever is less - over the past 12-month period, divided by the total net asset value (NAV) of the fund of the same period.</p> $\text{PTR} = \frac{\text{Min (Subscription, Redemption)}}{\text{Average NAV}}$
