Fund performance

Fund information

Investment in mutual funds **is not** a money deposit.

## What are you investing in?

- **Investment Policy**

- Focus on domestic investment in the following types of assets:

- (1) Minimum 70% of fund assets are invested in debt instruments of government sector.

- (2) The remaining is invested in debt instruments of private sector, financial institutions or bank deposits.

- The above instruments are assigned the top two ratings for short-term credit rating or equivalent long-term credit rating or the top three ratings for long-term credit rating except for government instruments with duration not exceeding 397 days since the fund inception.

- The fund's portfolio duration at any point in time is not over 92 days.

- **Management Style**

Aim for better returns over the fund's benchmark (Active Management)

## Who is the fund suitable for?

- Investors who expect similar rate of return as bank deposits and accept lower return than investment in fixed income funds.

- Investors who require high liquidity.

- Investors who prefer low risk investment.

## This fund **is not suitable for:**

Investors who expect high rate of return.

**For further clarification on this investment policy and potential risks, what should you do?**

- **Read the full prospectus or seek advice from the management company or its appointed selling agents.**

**Unless you have full grasp in the nature of risks, it is advisable you should refrain from investment in this fund.**

# What are the key risks of the Fund?

## • Important Risk Warnings

- Investing in investment units is not a money deposit and involves risks. Investors may get a return in an amount higher or lower than the amount initially invested. Please study product's features, conditions and relevant risks before making investment decision.
- Although a money market fund can invest only in low-risk assets, it is possible to incur losses.

**Risk Spectrum of the Fund**

## Key Risks

### 1. Credit risk of debt instrument issuers

	<b>Low Risk</b>				<b>High Risk</b>
National credit rating	Gov.bond/AAA	AA, A	BBB	Below BBB	unrated
	<b>Low Risk</b>				<b>High Risk</b>
International credit rating	AAA	AA, A	BBB	Below BBB	unrated

Remark: Major credit ratings of the fund as highlighted in credit rating box(es) mean that this fund invested more than or equal to 20% of NAV in securities with those credit.

### 2. Market risk

	<b>Low Risk</b>				<b>High Risk</b>
Portfolio Duration as of 28 February, 2020 is 0.11	< 3 months	3 months - 1 year	1 - 3 years	3 - 5 years	> 5 years
	<b>Low Risk</b>				<b>High Risk</b>
Standard Deviation (SD)	< 5%	5-10%	10 - 15%	15 - 25%	> 25%

\*Standard Deviation (SD) is calculated from the last 5 years (or since launch for the fund launched within that period)

3.High issuer concentration risk

Asset allocation

## Fees

**\*Fees affect the return on investment, investors should consider such fees before making an investment decision.\***

### Fees Charged to the Fund (% p.a. of NAV)

### Fees Charged to Unitholders (% of trading value)

Details	Maximum Charge	Actual Charge
Front-end fee	None	None
Back-end fee	None	None
Switching-in fee	None	None
Switching-out fee	None	None
Early Redemption and Switching-out fee	None	None
Unit transfer fee	10 Baht per 1,000 units or any fraction thereof	10 Baht per 1,000 units or any fraction thereof
Brokerage fee	None	None

Remark : All above mentioned fees are inclusive of Value Added Tax or Specific Business Tax or other taxes.

# Fund performance

**\*Past performance is not a guarantee of future performance\***

## 1. Benchmark

1. Zero Rate Return (ZRR) Index with an approximately 1-month tenor: 55.00%
  2. Average interest rate for 3-month fixed deposits with the amount less than 5 million Baht of 3 major banks, namely, Bangkok Bank, Kasikorn Bank and Siam Commercial Bank; after tax: 45.00%
- \*The new benchmark which reflect the taxation of investment in debt securities (Net TRN Index) is effective from 31 October 2019 onwards.

## 2. Calendar year performance

\* For the year when the fund incepted, the calendar year performance is the cumulative return from an inception date to year end.

## 3. Maximum drawdown of the investment in the last five years :0.00 %

(\*Or since launch for the fund launched within that period)

## 4. Standard deviation of the fund performance : 0.04 % p.a.

(SD is calculated from the last 5 years or since launch for the fund launched within that period)

## 5. Tracking error : N/A

## 6. Fund category based on peer group fund performance : Money Market - Government

## 7.Fund performance (%)

Performance	YTD	3 Months		6 Months		1 Year		3 Years		5 Years		10 Years		Since Inception
		%	Perce tile	%	Perce tile	%	Perce tile	%	Perce tile	%	Perce tile	%	Perce tile

**Disclaimer of Peer Group Fund Performance**

1. Past performance does not guarantee future results.
2. More details information about fund performance can be obtained via AIMC website [www.aimc.or.th](http://www.aimc.or.th)
3. Peer group comparison can be obtained at point of sale. It is used to measure the performance of mutual funds under the same category by percentiles which divide the set of data into 100 equal parts and rank from lowest to highest.
  - 5th Percentile (Top 5% performance)
  - 25th Percentile (Top 25% performance)
  - 50th Percentile (Median performance)
  - 75th Percentile (Bottom 25% performance)
  - 95th Percentile (Bottom 5% performance)
4. Fund returns are annualized for periods longer than one year.

## Detailed Explanation of Disclosures in the Prospectus

The information disclosed below is a summary of risk dimensions.

Topic	Disclosure																																																
1	<p>Credit Risk is expressed in terms of credit rating which indicates the likelihood of counterparty's meeting its obligations, and assessed using the historical performance, and financial position of the issuer. Long-term bonds may be assigned one of the following credit ratings.</p> <table border="1" data-bbox="416 439 1544 846"> <thead> <tr> <th>Grade</th> <th>TRIS</th> <th>Fitch</th> <th>Mood y's</th> <th>S&amp;P</th> <th>Explanation</th> </tr> </thead> <tbody> <tr> <td rowspan="4">Investment Grade</td> <td>AAA</td> <td>AAA(th)</td> <td>Aaa</td> <td>AAA</td> <td>Highest rating with <u>lowest risk</u> of the issuer's default</td> </tr> <tr> <td>AA</td> <td>AA(th)</td> <td>Aa</td> <td>AA</td> <td>Second highest rating with <u>very low risk</u> of the issuer's default</td> </tr> <tr> <td>A</td> <td>A(th)</td> <td>A</td> <td>A</td> <td><u>Low risk</u> of the issuer's default</td> </tr> <tr> <td>BBB</td> <td>BBB(th)</td> <td>Baa</td> <td>BBB</td> <td><u>Moderate risk</u> of the issuer's default</td> </tr> <tr> <td>Below Investment Grade</td> <td>Below BBB</td> <td>Below BBB(th)</td> <td>Below Baa</td> <td>Below BBB</td> <td><u>High risk</u> of the issuer's default</td> </tr> </tbody> </table> <p>Major credit ratings of the fund as highlighted in credit rating box(es) mean that this fund invested more than or equal to 20% of NAV in securities with those credit.</p>	Grade	TRIS	Fitch	Mood y's	S&P	Explanation	Investment Grade	AAA	AAA(th)	Aaa	AAA	Highest rating with <u>lowest risk</u> of the issuer's default	AA	AA(th)	Aa	AA	Second highest rating with <u>very low risk</u> of the issuer's default	A	A(th)	A	A	<u>Low risk</u> of the issuer's default	BBB	BBB(th)	Baa	BBB	<u>Moderate risk</u> of the issuer's default	Below Investment Grade	Below BBB	Below BBB(th)	Below Baa	Below BBB	<u>High risk</u> of the issuer's default															
Grade	TRIS	Fitch	Mood y's	S&P	Explanation																																												
Investment Grade	AAA	AAA(th)	Aaa	AAA	Highest rating with <u>lowest risk</u> of the issuer's default																																												
	AA	AA(th)	Aa	AA	Second highest rating with <u>very low risk</u> of the issuer's default																																												
	A	A(th)	A	A	<u>Low risk</u> of the issuer's default																																												
	BBB	BBB(th)	Baa	BBB	<u>Moderate risk</u> of the issuer's default																																												
Below Investment Grade	Below BBB	Below BBB(th)	Below Baa	Below BBB	<u>High risk</u> of the issuer's default																																												
2	<p>Market risk is the risk relating to fluctuation in value of securities, the loss of which is due to the factors that affect an entire market or asset class. Market risk has different effect on different type of funds as follows:</p> <table border="1" data-bbox="416 1120 1536 1301"> <thead> <tr> <th colspan="8">Fixed-income fund – The market risk is assessed based on the portfolio duration.</th> </tr> <tr> <th></th> <th>Low</th> <th colspan="5"></th> <th>High</th> </tr> </thead> <tbody> <tr> <td>Average portfolio duration</td> <td></td> <td>&lt; 3 months</td> <td>3 months – 1 year</td> <td>1-3 years</td> <td>3-5 years</td> <td>&gt; 5 years</td> <td></td> </tr> </tbody> </table> <p>(1) <b>Fixed-income fund</b> is generally exposed to the market risk upon changes in interest rates which depend on external factors such as economic conditions, investment climate, and political factors in the issuer's country or other country. Fixed-income instrument prices and interest rates move in opposite directions. For example, if the interest rate in the money market is likely to increase, prices of newly issued instruments will be high and therefore instruments that have been issued previously will be traded at lower prices. Mutual funds of long portfolio duration have higher chance of experiencing market risk than mutual funds of shorter portfolio duration.</p> <table border="1" data-bbox="416 1637 1536 1776"> <thead> <tr> <th colspan="8">Mutual Fund – The market risk is assessed based on the annual standard deviation (SD) of the fund performance.</th> </tr> <tr> <th></th> <th>Low</th> <th colspan="5"></th> <th>High</th> </tr> </thead> <tbody> <tr> <td>SD</td> <td></td> <td>&lt; 5%</td> <td>5-10%</td> <td>10-15%</td> <td>15-25%</td> <td>&gt; 25%</td> <td></td> </tr> </tbody> </table> <p>(2) <b>Mutual Fund</b> is generally exposed to the market risk when the value of the securities in which the fund deviates (increase or decrease) as a result of external factors such as economic conditions, investment climate, political factors in the issuer's country or other country. The market risk is expressed in terms of standard deviation (SD) – the higher the SD, the higher the market risk (due to changes in securities prices).</p>	Fixed-income fund – The market risk is assessed based on the portfolio duration. SD		< 5%	5-10%	10-15%	15-25%	> 25%																																											

	Topic	Disclosure																					
3	<b>Currency Risk</b>	<p><b>Currency Risk</b> is the possibility that changes in exchange rate will affect the value of investment units. For example, if a mutual fund invests in securities denominated in US Dollar during Thai Baht depreciation and the units are subsequently sold when Thai Baht appreciates, the mutual fund will receive lower return in Thai Baht. On the other hand, if the same fund invests in securities denominated in US Dollar during Thai Baht appreciation and the units are subsequently sold when Thai Baht depreciates, the mutual fund will receive higher return in Thai Baht. Therefore, currency hedging techniques as follows are key tools to manage such risk.</p> <table border="1" data-bbox="416 405 1536 640"> <tr> <td colspan="7" data-bbox="416 405 1536 506">Currency risk is assessed based on the exchange rate hedging policy of the fund.</td> </tr> <tr> <td data-bbox="416 506 627 539"></td> <td data-bbox="627 506 699 539">Low</td> <td data-bbox="699 506 882 539"></td> <td data-bbox="882 506 1038 539"></td> <td data-bbox="1038 506 1230 539"></td> <td data-bbox="1230 506 1394 539"></td> <td data-bbox="1394 506 1536 539">High</td> </tr> <tr> <td data-bbox="416 539 627 640">FX hedging</td> <td data-bbox="627 539 699 640"></td> <td data-bbox="699 539 882 640">Fully / Almost fully hedged</td> <td data-bbox="882 539 1038 640">Partially</td> <td data-bbox="1038 539 1230 640">At discretion</td> <td data-bbox="1230 539 1394 640">No hedging</td> <td data-bbox="1394 539 1536 640"></td> </tr> </table> <ul data-bbox="464 680 1536 920" style="list-style-type: none"> <li>• <b>Fully / Almost fully hedged:</b> Investors have no exposure to currency risk.</li> <li>• <b>Partially-hedged with fixed ratio:</b> Investors may be exposed to certain level of currency risk.</li> <li>• <b>Hedging at discretion of the fund manager:</b> Investors may be exposed to currency risk because it is the discretion of the fund manager whether to use a currency hedging technique.</li> <li>• <b>No hedging:</b> Investors are exposed to currency risk.</li> </ul>	Currency risk is assessed based on the exchange rate hedging policy of the fund.								Low					High	FX hedging		Fully / Almost fully hedged	Partially	At discretion	No hedging	
Currency risk is assessed based on the exchange rate hedging policy of the fund.																							
	Low					High																	
FX hedging		Fully / Almost fully hedged	Partially	At discretion	No hedging																		
4	<b>High Issuer Concentration Risk</b>	<p>This risk comes from investing more than 10% of the fund's NAV in one issuer, party, or other person who has obligations under the instruments or the contracts.</p> <p>Concentration risk does not include investment in the following assets:</p> <p>Thai government bonds;</p> <p>Investment-grade foreign government bonds; and</p> <p>Investment-grade deposits or cash-equivalent instruments of a depository or an issuer.</p>																					
5	<b>Maximum Drawdown</b>	<p>Maximum drawdown means an accumulated loss as a result of the investment in the past five years from the reporting date (or since inception if the fund has been established for less than five years). It is calculated as follows:</p> $\text{Drawdown}_{(t)} = \frac{\text{Unit value}_{(t)} - \text{Highest unit value}^*}{\text{Highest unit value}^*}$ $\text{Maximum Drawdown} = \min (\text{Drawdown}(t))$ <p>Remark: * Highest unit value means the highest value of unit in the preceding period up to the calculation date (t).</p>																					
6	<b>Standard Deviation</b>	<p>Standard Deviation (SD) of Fund measures the volatility the fund's returns, using the calculation as prescribed by Association of Investment Management Companies re: Standard for Measurement and Presentation of Performance of the Mutual Funds. SD expresses the historical performance in annual percentage for the five years preceding the reporting date.</p>																					
7	<b>Tracking Error</b>	<p>Tracking Error (TE) is the difference between a mutual fund portfolio's returns and the benchmark index it was designed to copy. This indicates how well the mutual fund is performing against the benchmark index and shows how much the mutual fund deviates from the benchmark index. For example, if the mutual has a low TE, this means the fund has slightly deviated from the benchmark index and therefore the fund is efficient in</p>																					

	<b>Topic</b>	<b>Disclosure</b>
		<p>copying the benchmark index. On the other hand, if the mutual has a low TE, this means the fund has substantially deviated from the benchmark index and therefore it is unlikely that the fund will achieve return at similar rate to the benchmark index.</p> <p>TE is used for tracking error of passive funds/ index tracking such as index fund or ETF.</p>
8	<b>Portfolio Turnover Ratio</b>	<p>Portfolio Turnover Ratio (PTR) is the percentage of a mutual fund or other investment's holdings that have been replaced in a given year which can better reflect the investment strategies employed by the fund manager. It is calculated by taking either the total amount of new securities purchased or the amount of securities sold - whichever is less - over the past 12-month period, divided by the total net asset value (NAV) of the fund of the same period.</p> $\text{PTR} = \frac{\text{Min (Subscription, Redemption)}}{\text{Average NAV}}$
