

Krungsri Foreign Fixed Income 6M127 Fund-Not for Retail Investors (AI)

KFFAI6M127

Fund Type / Fund Type based on peer group performance

- Foreign Fixed Income Fund
- Fund investing primarily offshore with foreign investment related risks
- Miscellaneous

Investment Policy and Management Style

- The Fund shall invest offshore in an average amount per accounting year of no less than 80% of NAV and focus to invest in debt instruments and/or deposits and/or sukuk issued, certified, avalized, or repayment-guaranteed by the government, a state enterprise, a financial institution, and/or private entity, where such instruments are designated as investment grade in either the issue rating category or the issuer rating category.
- The Fund will consider investing in derivatives whereby the agreement for fully hedging against exchange rate will be made.
- This is a buy-and-hold fund where the fund makes investment once and holds the assets until maturity.

Risk Spectrum

Low to Moderate Risk

Investing in government bonds, private sector debentures, with non-investment grade/unrated securities accounting for not exceeding 20% of NAV.

Remark:

Krungsri Foreign Fixed Income 6M127 Fund-Not for Retail Investors (AI) (“the Source Fund”) does not open for redemption during the project life. The Management Company will process the redemption of investment units by automatically switching in full all Investment units to the Krungsri Star Plus Fund-A (KFSPLUS-A) or other Fixed income fund (“the Destination Fund”) on the business day preceding the expiration of the project life. If the expiry date of the project life falls upon any holiday to be announced in the future, the Management Company shall postpone such expiry date to the next business day while the return will be calculated until the previous expiry date before the change as the maturity date of the instruments invested by the Fund has already been determined and cannot be changed according to the additional holiday that may exist in the future. Unitholders will obtain the investment units of the Destination Fund after automatic switching on the next business day and will be able to redeem or switch-out the investment units in accordance with the conditions stipulated in the prospectus of the Destination Fund.

However, in any case where the Management Company considers it to be the utmost interests of the unitholders, the Management Company will process the automatic redemption of the investment units of Krungsri Foreign Fixed Income 6M127 Fund-Not for Retail Investors (AI) together with all the remaining investment units held by every unitholder on the fund termination date and pay the proceeds from such automatic redemption to the unitholders within the next business day.

Total					1.48%
Estimated fund expense ⁽³⁾					(0.13%)
Estimated return which unitholder will receive from auto-redemption (per annum) ⁽⁴⁾					1.35%
Duration of security (approximately)					6 months

Remark:

- (1) The Management Company shall exercise discretion in changing assets for investment or investment proportion when the action is taken as necessary and appropriate in the best interest of the investors, provided that the total risk profile of the assets for investment shall not materially change. The management company may consider investing in other debt instruments instead and/or new types of instruments may be added to the above. The example includes, but not limited Bank of China (BOC), Industrial and Commercial Bank of China (ICBC), Industrial and Commercial Bank of China Asia (ICBC Asia), Bank of East Asia (BEA), China Construction Bank (CCB), Standard Chartered Bank (Singapore), Standard Chartered Bank (Hong Kong), United Overseas Bank LTD (UOB), Abu Dhabi Commercial Bank (ADCB), Mashreqbank PSC (MASQ), Qatar National Bank (QNB), CIMB, Bank of Communications (BOCOM), First Abu Dhabi Bank (FAB), Emirates NBD PJSC (ENBD), Bank Negara Indonesia Persero Tbk PT (BNI), Bank Rakyat Indonesia (BRI), Malayan Banking BHD, Kingdom of Thailand (TB), Bank of Thailand (BOT), Supalai PCL., Land and House PCL., Ayudhya Capital Auto lease PLC., Bank of Ayudhya, CIMBT Bank, TISCO Bank, Government Housing Bank (GHB), Government Saving Bank (GSB), Kiatnakin Phatra Bank PCL., TMBThanachart Bank, Siam Commercial Bank, Kasikorn Bank, United Overseas Bank Thai, Bangkok Bank, Krung Thai Bank, Masraf Al Rayan QPSC (MARK), Japan (JP), United States (US), Singapore (SG), Monetary Authority of Singapore (MAS, SG), Germany (GR), Australia (AU), and/or other debt securities under KSAM investment universe.
- (2) Rate of return proposed by the issuers or the sellers is as of 1 August 2025.
- (3) Fund expenses (Management fee included) can be changed as appropriate. In the case where the fund generates greater return than what was disclosed during the IPO period, the Management Company may collect higher management fee than the initially estimated rates but not exceeding the maximum rates as specified in the Fund's Prospectus.
- (4) In case that the Management Company could not invest in the target portfolio due to changing in market conditions, or related tax rate/scheme of the underlying securities has been changed significantly, the unitholders thus may not receive the return at the proposed yield and/or the company may consider not to provide auto-redemption at the proposed rate.
- (5) Credit rating from other credit rating agencies may be different from the above referred credit rating.

Definitions

Maximum Drawdown: The maximum percentage of loss of a fund over the past 5 years (or since inception if the fund has been established for less than 5 years). It is measured from the highest value of the fund's NAV per unit to the lowest value during the period that the NAV per unit is depreciating. The Maximum drawdown is used to assess the risk of possible loss that could occur from investing in a fund.

Recovering Period: A duration of time that let the investors know how long it will take for a fund to recover from a peak of loss to the original level of investment.

FX Hedging: Percentage of foreign currency denominated assets in the investment portfolio that are hedged against foreign exchange risk.

Portfolio Turnover Ratio: The trading frequency of assets in the investment portfolio during a certain period of time. It is calculated by taking either the total amount of new securities purchased or the number of securities sold (whichever is less) over a period of one year, divided by the average net asset value (NAV) of the fund over the corresponding period. A fund with high portfolio turnover indicates that the securities in the portfolio are frequently traded by the fund manager and hence high securities dealing cost. Therefore, investors must take into consideration the performance of the fund in order to determine the cost worthiness of such securities trading transactions.

Yield to Maturity (YTM): The rate of return earned from a debt instrument that is held by the investor until its maturity date. It is calculated from the total coupon payments to be received throughout the maturity of the instrument plus the principal repayments, converted into present discounted value. The YTM is used to measure the rate of return of a fixed income fund by weighting the average yield of each debt instrument in the portfolio. Since YTM is expressed as an annual percentage, it can be used for performance comparison between different fixed income funds with a held-to-maturity investment policy which have similar investment characteristics.
