Fund information

Investment in mutual funds **is not** a money deposit.

What are you investing in?

- **Investment Policy**

- The fund invests in local equity market from 0 - 100% of its NAV.
- The fund also invests in domestic debt instruments of government sector, financial institutions, private companies or bank deposits.
- The fund may also invest in equity instruments and/or debt instruments in foreign countries and enter into future contracts to enhance efficiency in investment management or structured notes (such approach not currently in use).

- **Management Style**

Aim for better returns over the fund's benchmark (Active Management)

Who is the fund suitable for?

- Investors who can accept fluctuation of prices of fixed-income instruments and equities in which the fund invests, which may increase or decrease to the level below the initial investment, resulting in a loss.
- Investors who can make medium to long term investment in anticipation of better return in long term than investment in fixed-income instruments.

This fund **is not suitable for:**

Investors who prefer fixed rate of return or preserve full amount of principal.

For further clarification on this investment policy and potential risks, what should you do?

- **Read** the full prospectus or **seek** advice from the management company or its appointed selling agents.

Unless you have full grasp in the nature of risks, it is advisable you should refrain from investment in this fund.

What are the key risks of the Fund?

- **Important Risk Warnings**
 - This fund invests in debt instruments and stocks which their price can be fluctuated according to the change of interest rate, financial status of issuers, economic situation etc.
 - In the case where there is a tendency that more than two-thirds of the total mutual fund units sold are to be redeemed, the Management Company may dissolve the fund at its discretion and may cancel the redemption orders it has already received or stop accepting such orders.

Risk Spectrum of the Fund

Key Risks

1. Market risk

	Low Risk				High Risk

 - 5th Percentile (Top 5% performance)
 - 25th Percentile (Top 25% performance)
 - 50th Percentile (Median performance)
 - 75th Percentile (Bottom 25% performance)
 - 95th Percentile (Bottom 5% performance)
4. Fund returns are annualized for periods longer than one year.

Detailed Explanation of Disclosures in the Prospectus

The information disclosed below is a summary of risk dimensions.

	Topic	Disclosure																								
1	Market Risk	<p>Market risk is the risk relating to fluctuation in value of securities, the loss of which is due to the factors that affect an entire market or asset class. Market risk has different effect on different type of funds as follows:</p> <table border="1" data-bbox="416 371 1536 510"> <tr> <td colspan="8" data-bbox="416 371 1536 439">Mutual Fund – The market risk is assessed based on the annual standard deviation (SD) of the fund performance.</td> </tr> <tr> <td data-bbox="416 439 555 472"></td> <td data-bbox="555 439 635 472">Low</td> <td colspan="5" data-bbox="635 439 1398 472"></td> <td data-bbox="1398 439 1536 472">High</td> </tr> <tr> <td data-bbox="416 472 555 510">SD</td> <td data-bbox="555 472 635 510"></td> <td data-bbox="635 472 783 510">< 5%</td> <td data-bbox="783 472 954 510">5-10%</td> <td data-bbox="954 472 1102 510">10-15%</td> <td data-bbox="1102 472 1251 510">15-25%</td> <td data-bbox="1251 472 1398 510">> 25%</td> <td data-bbox="1398 472 1536 510"></td> </tr> </table> <p>Mutual Fund is generally exposed to the market risk when the value of the securities in which the fund deviates (increase or decrease) as a result of external factors such as economic conditions, investment climate, political factors in the issuer’s country or other country. The market risk is expressed in terms of standard deviation (SD) – the higher the SD, the higher the market risk (due to changes in securities prices).</p>	Mutual Fund – The market risk is assessed based on the annual standard deviation (SD) of the fund performance.									Low						High	SD		< 5%	5-10%	10-15%	15-25%	> 25%	
Mutual Fund – The market risk is assessed based on the annual standard deviation (SD) of the fund performance.																										
	Low						High																			
SD		< 5%	5-10%	10-15%	15-25%	> 25%																				
2	High Issuer Concentration Risk	<p>This risk comes from investing more than 10% of the fund’s NAV in one issuer, party, or other person who has obligations under the instruments or the contracts.</p> <p>Concentration risk does not include investment in the following assets:</p> <p>Thai government bonds;</p> <p>Investment-grade foreign government bonds; and</p> <p>Investment-grade deposits or cash-equivalent instruments of a depository or an issuer.</p>																								
3	Maximum Drawdown	<p>Maximum drawdown means an accumulated loss as a result of the investment in the past five years from the reporting date (or since inception if the fund has been established for less than five years). It is calculated as follows:</p> $\text{Drawdown}_{(t)} = \frac{\text{Unit value}_{(t)} - \text{Highest unit value}^*}{\text{Highest unit value}^*}$ $\text{Maximum Drawdown} = \min (\text{Drawdown}(t))$ <p>Remark: * Highest unit value means the highest value of unit in the preceding period up to the calculation date (t).</p>																								
4	Standard Deviation	<p>Standard Deviation (SD) of Fund measures the volatility the fund's returns, using the calculation as prescribed by Association of Investment Management Companies re: Standard for Measurement and Presentation of Performance of the Mutual Funds. SD expresses the historical performance in annual percentage for the five years preceding the reporting date.</p>																								
5	Tracking Error	<p>Tracking Error (TE) is the difference between a mutual fund portfolio's returns and the benchmark index it was designed to copy. This indicates how well the mutual fund is performing against the benchmark index and shows how much the mutual fund deviates from the benchmark index. For example, if the mutual has a low TE, this means the fund has slightly deviated from the benchmark index and therefore the fund is efficient in copying the benchmark index. On the other hand, if the mutual has a low TE, this means the fund has substantially deviated from the benchmark index and therefore it is unlikely that the fund will achieve return at similar rate to the benchmark index.</p> <p>TE is used for tracking error of passive funds/ index tracking such as index fund or ETF.</p>																								

	Topic	Disclosure
6	Portfolio Turnover Ratio	<p>Portfolio Turnover Ratio (PTR) is the percentage of a mutual fund or other investment's holdings that have been replaced in a given year which can better reflect the investment strategies employed by the fund manager. It is calculated by taking either the total amount of new securities purchased or the amount of securities sold - whichever is less - over the past 12-month period, divided by the total net asset value (NAV) of the fund of the same period.</p> $\text{PTR} = \frac{\text{Min (Subscription, Redemption)}}{\text{Average NAV}}$
