Fund information

Investment in mutual funds **is not** a money deposit.

What are you investing in?

• Investment Policy

- Minimum 80% of NAV in average of fund accounting year are invested in the Master Fund named, Nikko AM ARK Disruptive Innovation Fund, Class A (USD) (ISIN Code:LU1861556378).
- The Master Fund has the policy to invest in global equity securities of companies that are relevant to investment theme of disruptive innovation.
you may visit <https://emea.nikkoam.com/ucits>
- The Fund may invest in non-investment grade or unrated securities, with the total portion of such investments combined with the investments of the Master Fund not exceeding 20% of the Fund's NAV. Besides, the Fund may invest in unlisted securities and structured notes in accordance with the rules as specified by the SEC Office.
- The Fund will enter into derivatives contracts almost totally, or no less than 90% of its foreign investments, for the purpose of hedging against foreign exchange rate risk. Also, the Fund may enter into derivatives contracts for efficient portfolio management at the discretion of the Management Company.
- The Management Company reserves the right to change the type and feature of the Fund to a "fund of funds" or making direct investments in foreign instruments and/or securities or to revert to "feeder fund" in the future without increasing the risk spectrum of the Fund. In this respect, the change shall be made at the Fund Manager's discretion according to market situation by taking into consideration the utmost benefits of the unitholders.

• Management Style

- The Fund aims to track investment return of the Master Fund
- The Master Fund aims to generate higher return than the benchmark (Active Management)

Who is the fund suitable for?

- Investors who can accept fluctuation in price of securities in which the Fund invests, which may increase or decrease to below the value of investment and thus resulting in loss.
- Investors who are able to make medium to long term investment, expecting better return in a long term than investment in fixed-income instruments.

This fund **is not suitable for:**

Investors who prefer fixed rate of return or preserve full amount of principal.

For further clarification on this investment policy and potential risks, what should you do?

- **Read the full prospectus or seek advice from the management company or its appointed selling agents.**

Unless you have full grasp in the nature of risks, it is advisable you should refrain from investment in this fund.

What are the key risks of the Fund?

• Important Risk Warnings

- The Fund will enter into a forward contract to hedge against the exchange rate risk at a particular time for the value of at least 90% of the foreign investment value, in which case, it may incur costs for risk hedging transaction and the increased costs may reduce overall return.
- The Master Fund may engage in derivatives contracts for the purpose of foreign exchange hedging at the discretion of its fund manager. Hence, the Master Fund may contain exchange rate risk.
- The Fund and/or the Master Fund may invest in forward contract to enhance efficiency portfolio management and structured note. This means the Fund may contain higher risks than other funds which invest directly in underlying assets. Therefore, it may have gain/loss higher than investing directly in underlying assets.
- The Master Fund may impose a restriction on the redemption of investment units to not exceeding 10% of its total investment units on each trading day. If the unitholders of the Master Fund redeem the investment units in aggregate in the amount greater than the specified limit on any trading day, the Master Fund may postpone the calculation of the redemption price and the net asset value of the Master Fund, including the schedule for paying the redemption proceeds, until the Master Fund is able to completely dispose of the securities in the portfolio in accordance with the redemption amount. In addition, under extraordinary circumstances, the Master Fund may temporarily suspend the redemption of all or part of the investment units as instructed. As a result, the unitholders may receive the redemption proceeds later than the specified period.
- The Master Fund may impose restriction on the redemption of investment units that not more than 10% of its net asset value (NAV) can be redeemed on each business day. In the case that the redemption amount made by the unitholders of the Master Fund is greater than the specified limit, the Master Fund may decide to delay the calculation of the redemption price and the net asset value of the Master Fund until the Company has sold the corresponding assets (which it will endeavour to do without unnecessary delay).
- This mutual fund's investment is highly concentrated in United States, therefore investors should consider diversify the risks in their portfolio.

Risk Spectrum of the Fund

Key Risks

1. Market risk

	Low Risk				High Risk
Standard Deviation (SD)	< 5%	5-10%	10 - 15%	15 - 25%	> 25%

*Standard Deviation (SD) is calculated from the last 5 years (or since launch for the fund launched within that period)

2. Exchange rate risk

	Low Risk			High Risk
FX Hedging	Fully/Almost fully hedge	Partially	At discretion	No hedging

Remark: The fund will enter into a forward contract to hedge against the exchange rate risk at least of 90% of the foreign investment value.

3. High concentration risk

	Low Risk				High Risk
Issuer concentration risk	≤ 10%	10-20%	20-50%	50-80%	> 80%

	Low Risk			High Risk
Sector concentration risk	≤ 20%	20-50%	50-80%	> 80%

Remark: This fund has concentration investment in Healthcare and Information Technology

	Low Risk			High Risk
Country concentration risk	≤ 20%	20-50%	50-80%	> 80%

Remark: This fund has concentration investment in United States

Asset allocation

Portfolio Breakdown (% of NAV)

Sector Breakdown (% of NAV)

Top Five Holdings (% of NAV)

Tesla Motor Inc	9.69
Teladoc Health Inc	5.19
Roku Inc	5.16
Unity Software Inc	4.67
Coinbase Global Inc	4.58

Disclaimer

- Investment in Mutual Fund is not a form of saving and not protected by Deposit Protection Agency. Therefore, investment in Mutual Fund involves risk including possible loss of the principal amount invested.
- The fund is approved by The office of the SEC.
- The draft prospectus for KFINNO-A does not indicate that The office of the SEC has certified the accuracy of the information contained in the prospectus nor guaranteed the price or return on investment for such fund. The Management Company has reviewed the information in this summary prospectus as at 30 September, 2021 with professional care as the party responsible for the management of the fund and certifies that the above information is correct, true and not misleading.
- Units in the Fund are divided into three classes – dividend class, accumulation class and institutional class. Unitholders may switch the type of units in the Fund under the terms and conditions specified by the Management Company. The Management Company will make a separate calculation of asset value of each class of units. Different classes of units may have the same or different net asset value per unit.
- Classification of units shall not affect the responsibility of the Fund to a third party since responsibility of the Fund for each type of units is separated. All assets of the Fund remain under equal responsibility to a third party.

Disclaimer of Peer Group Fund Performance

1. Past performance does not guarantee future results.
2. More details information about fund performance can be obtained via AIMC website www.aimc.or.th
3. Peer group comparison can be obtained at point of sale. It is used to measure the performance of mutual funds under the same category by percentiles which divide the set of data into 100 equal parts and rank from lowest to highest.
 - 5th Percentile (Top 5% performance)
 - 25th Percentile (Top 25% performance)
 - 50th Percentile (Median performance)
 - 75th Percentile (Bottom 25% performance)
 - 95th Percentile (Bottom 5% performance)
4. Fund returns are annualized for periods longer than one year.

Detailed Explanation of Disclosures in the Prospectus

The information disclosed below is a summary of risk dimensions.

Topic	Disclosure																								
1	<p>Market Risk</p> <p>Market risk is the risk relating to fluctuation in value of securities, the loss of which is due to the factors that affect an entire market or asset class. Market risk has different effect on different type of funds as follows:</p> <table border="1" data-bbox="416 405 1536 544"> <tr> <td colspan="8">Mutual Fund – The market risk is assessed based on the annual standard deviation (SD) of the fund performance.</td> </tr> <tr> <td></td> <td>Low</td> <td></td> <td></td> <td></td> <td></td> <td></td> <td>High</td> </tr> <tr> <td>SD</td> <td></td> <td>< 5%</td> <td>5-10%</td> <td>10-15%</td> <td>15-25%</td> <td>> 25%</td> <td></td> </tr> </table> <p>Mutual Fund is generally exposed to the market risk when the value of the securities in which the fund deviates (increase or decrease) as a result of external factors such as economic conditions, investment climate, political factors in the issuer’s country or other country. The market risk is expressed in terms of standard deviation (SD) – the higher the SD, the higher the market risk (due to changes in securities prices).</p>	Mutual Fund – The market risk is assessed based on the annual standard deviation (SD) of the fund performance.									Low						High	SD		< 5%	5-10%	10-15%	15-25%	> 25%	
Mutual Fund – The market risk is assessed based on the annual standard deviation (SD) of the fund performance.																									
	Low						High																		
SD		< 5%	5-10%	10-15%	15-25%	> 25%																			
2	<p>Currency Risk</p> <p>Currency Risk is the possibility that changes in exchange rate will affect the value of investment units. For example, if a mutual fund invests in securities denominated in US Dollar during Thai Baht depreciation and the units are subsequently sold when Thai Baht appreciates, the mutual fund will receive lower return in Thai Baht. On the other hand, if the same fund invests in securities denominated in US Dollar during Thai Baht appreciation and the units are subsequently sold when Thai Baht depreciates, the mutual fund will receive higher return in Thai Baht. Therefore, currency hedging techniques as follows are key tools to manage such risk.</p> <table border="1" data-bbox="416 1048 1536 1283"> <tr> <td colspan="7">Currency risk is assessed based on the exchange rate hedging policy of the fund.</td> </tr> <tr> <td></td> <td>Low</td> <td></td> <td></td> <td></td> <td></td> <td>High</td> </tr> <tr> <td>FX hedging</td> <td></td> <td>Fully / Almost fully hedged</td> <td>Partially</td> <td>At discretion</td> <td>No hedging</td> <td></td> </tr> </table> <ul style="list-style-type: none"> • Fully / Almost fully hedged: Investors have no exposure to currency risk. • Partially-hedged with fixed ratio: Investors may be exposed to certain level of currency risk. • Hedging at discretion of the fund manager: Investors may be exposed to currency risk because it is the discretion of the fund manager whether to use a currency hedging technique. • No hedging: Investors are exposed to currency risk. 	Currency risk is assessed based on the exchange rate hedging policy of the fund.								Low					High	FX hedging		Fully / Almost fully hedged	Partially	At discretion	No hedging				
Currency risk is assessed based on the exchange rate hedging policy of the fund.																									
	Low					High																			
FX hedging		Fully / Almost fully hedged	Partially	At discretion	No hedging																				
3	<p>High Concentration Risk</p> <table border="1" data-bbox="416 1682 1489 1765"> <tr> <td></td> <td style="text-align: center;">Low Risk</td> <td></td> <td></td> <td></td> <td style="text-align: center;">High Risk</td> </tr> <tr> <td>Issuer concentration risk</td> <td style="text-align: center;">≤ 10%</td> <td style="text-align: center;">10-20%</td> <td style="text-align: center;">20-50%</td> <td style="text-align: center;">50-80%</td> <td style="text-align: center;">> 80%</td> </tr> </table> <p>- High Issuer Concentration Risk</p> <p>This risk comes from investing more than 10% of the fund’s NAV in one issuer, party, or other person who has obligations under the instruments or the contracts.</p> <p>Concentration risk does not include investment in the following assets:</p> <p>Thai government bonds;</p> <p>Investment-grade foreign government bonds; and</p> <p>Investment-grade deposits or cash-equivalent instruments of a depository or an issuer.</p>		Low Risk				High Risk	Issuer concentration risk	≤ 10%	10-20%	20-50%	50-80%	> 80%												
	Low Risk				High Risk																				
Issuer concentration risk	≤ 10%	10-20%	20-50%	50-80%	> 80%																				

	Topic	Disclosure					
	- High Sector Concentration risk	<p style="text-align: center;">Low Risk High Risk</p> <table border="1" style="width: 100%; text-align: center;"> <tr> <td style="width: 25%;">Sector concentration risk</td> <td>≤ 20%</td> <td>20-50%</td> <td>50-80%</td> <td>> 80%</td> </tr> </table> <p>Remark: This fund has concentration investment in...</p> <p>This risk comes from the Fund investing in a single or further sector more than 20% of the total NAV. In the criteria which's not include investment in Thai or foreign government bonds or cash-equivalents of a depository.</p>	Sector concentration risk	≤ 20%	20-50%	50-80%	> 80%
Sector concentration risk	≤ 20%	20-50%	50-80%	> 80%			
	- High Country Concentration risk	<p style="text-align: center;">Low Risk High Risk</p> <table border="1" style="width: 100%; text-align: center;"> <tr> <td style="width: 25%;">Country concentration risk</td> <td>≤ 20%</td> <td>20-50%</td> <td>50-80%</td> <td>> 80%</td> </tr> </table> <p>Remark: This fund has concentration investment in...</p> <p>This risk comes from the Fund investing in a single or further country more than 20% of the total NAV.</p>	Country concentration risk	≤ 20%	20-50%	50-80%	> 80%
Country concentration risk	≤ 20%	20-50%	50-80%	> 80%			
4	Maximum Drawdown	<p>Maximum drawdown means an accumulated loss as a result of the investment in the past five years from the reporting date (or since inception if the fund has been established for less than five years). It is calculated as follows:</p> $\text{Drawdown}_{(t)} = \frac{\text{Unit value}_{(t)} - \text{Highest unit value}^*}{\text{Highest unit value}^*}$ $\text{Maximum Drawdown} = \min (\text{Drawdown}(t))$ <p>Remark: * Highest unit value means the highest value of unit in the preceding period up to the calculation date (t).</p>					
5	Standard Deviation	<p>Standard Deviation (SD) of Fund measures the volatility the fund's returns, using the calculation as prescribed by Association of Investment Management Companies re: Standard for Measurement and Presentation of Performance of the Mutual Funds. SD expresses the historical performance in annual percentage for the five years preceding the reporting date.</p>					
6	Tracking Error	<p>Tracking Error (TE) is the difference between a mutual fund portfolio's returns and the benchmark index it was designed to copy. This indicates how well the mutual fund is performing against the benchmark index and shows how much the mutual fund deviates from the benchmark index. For example, if the mutual has a low TE, this means the fund has slightly deviated from the benchmark index and therefore the fund is efficient in copying the benchmark index. On the other hand, if the mutual has a low TE, this means the fund has substantially deviated from the benchmark index and therefore it is unlikely that the fund will achieve return at similar rate to the benchmark index.</p> <p>TE is used for tracking error of passive funds/ index tracking such as index fund or ETF.</p>					
7	Portfolio Turnover Ratio	<p>Portfolio Turnover Ratio (PTR) is the percentage of a mutual fund or other investment's holdings that have been replaced in a given year which can better reflect the investment strategies employed by the fund manager. It is calculated by taking either the total amount of new securities purchased or the amount of securities sold - whichever is less - over the past 12-month period, divided by the total net asset value (NAV) of the fund of the same period.</p> $\text{PTR} = \frac{\text{Min (Subscription, Redemption)}}{\text{Average NAV}}$
