a subfund of First Sentier Investors Global Umbrella Fund plc (the Company)

The value of investments and any income from them may go down as well as up and is not guaranteed. Investors may get back significantly less than the original amount invested.

The Fund may experience the following risks:

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Single country / specific region risk: investing in a single country or specific region may be riskier than investing in a number of different countries or regions. Investing in a larger number of countries or regions helps spread risk.

Indian subcontinent risk: although India has seen rapid economic and structural development, investing there may still involve increased risks of political and governmental intervention, potentially limitations on the allocation of the Fund's capital, and legal, regulatory, economic and other risks including greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Smaller companies risk: investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

Below investment grade risk: below investment grade debt securities are speculative and involve a greater risk of default and price changes than investment grade debt securities. In periods of general economic difficulty, the market prices of these types of securities may decline significantly.

For further information on risks, please refer to the Risk Factors section in the Company prospectus.
