

Fund objectives and investment policy

The Schroder Asian Income (the "Fund") aims to provide income and capital growth over the medium to longer term by investing primarily in Asian equities (including real estate investment trusts) and Asian fixed income securities.

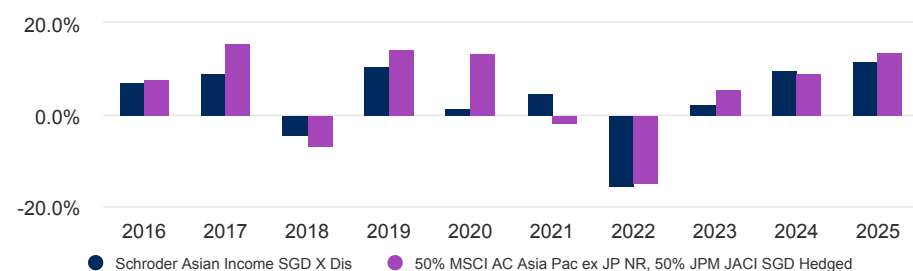

This fund may use financial derivative instruments as a part of the investment process. Derivatives carry a high degree of risk and should only be considered by sophisticated investors.

Past Performance is not a guide to future performance and may not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of investments to fall as well as rise. Performance data does not take into account any commissions and costs, if any, charged when units or shares of any fund, as applicable, are issued and redeemed.

Performance over 10 years (%)

Past performance and any forecasts are not necessarily a guide to the future or likely performance.

The value of investments and income from them can go down as well as up and is not guaranteed. Returns of more than 1 year are annualised. The distributions are not guaranteed and might be changed at the Manager's discretion in accordance with the Trust Deed. Ordinarily, they will be reviewed annually. In the event of the Fund's income and realised gains being less than indicated distribution amount per unit per annum, distributions will be made from capital, subject to trustee approval. Investors should be aware that the distributions may exceed the income and realised gains of the Fund at times and lead to a reduction of the amount originally invested, depending on the date of initial investment. The performance returns shown above are calculated based on the NAV after dilution adjustments (if any) have been applied. Where 'since inception' performance figures are stated, please note that the inception date is the same as the share class launch date under 'Fund Facts'.
