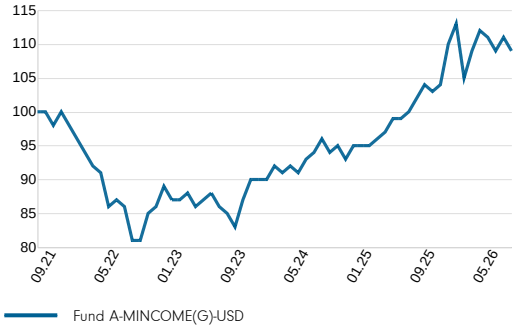
Investment Objective

The fund aims to achieve moderate capital growth over the medium to long term and provide income. The fund invests in a range of asset classes including debt securities, equities, real estate, infrastructure, from anywhere in the world, including emerging markets. The fund may invest in the following assets according to the percentages indicated:

- investment grade bonds: up to 100%
- below investment grade bonds: up to 60%
- emerging market bonds: up to 50%
- equities: up to 50%
- government bonds: up to 50%
- China A and B shares and listed onshore bonds (directly and/or indirectly): less than 20% (in aggregate)
- REITs and infrastructure securities: less than 30% (in each asset class)
- hybrids and contingent convertible (CoCo) bonds: less than 30%, with less than 20% in contingent convertible (CoCo) bonds
- money market instruments: up to 25%
- SPACs: less than 5%.

The fund may also invest in other subordinated financial debt and preference shares. The fund's exposure to distressed securities is limited to 10% of its assets. (For full details of the objective and other considerations please refer to the Prospectus)

Fund Performance (rebased to 100)



Performance is shown for the last 5 years (or since launch for funds launched within that period), rebased to 100.

^ Asset class breakdowns are provided for illustrative purposes only. Equity and FI exposure includes derivatives. The use of derivatives may cause the total fund weight not to equal 100%. "Cash & Other" can include exposure to cash funds, uninvested cash held within the underlying building blocks of the fund, currency positions and balancing items.

The fund may have exposure to contingent convertible securities ("CoCo bonds"), such as Additional Tier 1 and Tier 2 instruments issued by Singapore-incorporated banks and insurance companies. CoCo bonds are comparatively untested, more vulnerable to losses than equities, carry extension risk, can be highly volatile, and their issuers can cancel or modify scheduled income payments at will. For more information, please refer to the "Risk Descriptions" in the Singapore Prospectus.

Definition of Terms

Annualised Volatility is a measure of how variable returns for a fund or comparative market index have been around their historical average. Two funds may produce the same return over a period. The fund whose monthly returns have varied less will have a lower annualised volatility and will be considered to have achieved its returns with less risk.

Sharpe Ratio is a measure of a fund's risk adjusted performance taking into account the return on a risk-free investment. The ratio allows an investor to assess whether the fund is generating adequate returns for the level of risk it is taking. The higher the ratio, the better the risk-adjusted performance has been. If the ratio is negative, the fund has returned less than the risk-free rate.

Duration is a measure of sensitivity of the fund value to changes in interest rates and includes all investments in the fund including derivatives. It takes into account that expected cash flows will fluctuate as interest rates change and affect a bond's price.

The Top 10 Positions table shows the largest individual investments. For equities, all investments, including derivatives, linked to a particular issuing company have been combined to form a total percentage holding for each company. Where a company is listed in two separate countries, each listing may be classified as a separate issuing company. Fixed income investments are listed by individual issue (and not by issuer) to reflect the characteristics of the individual bonds. All derivatives are included on an exposure basis. Cash investments are not shown in the table.

*Gross estimated distribution yield

**For each bond in the fund, Fidelity looks at the rating given by three rating agencies (S&P, Moody's and Fitch) and applies the worst of the two best ratings (commonly known as the Basel method). If any derivatives are being used to adjust the credit quality of the fund, these are reflected in the Average Credit Rating".

FIL Investment Management (Singapore) Limited [FIMSL] (Co. Reg. No.: 199006300E) is a responsible entity for the fund in Singapore. Prospectus of the fund is available from FIMSL or its distributors upon request. Potential investors should read the prospectus before investing. All views expressed and references to specific securities are included for illustration only, and should not be construed as an offer or recommendation. This document is for information only and does not have regard to the specific investment objectives, financial situation and particular needs of the person who may receive it. Potential investor should seek advice from a financial adviser before investing. If that potential investor chooses not to seek advice from a financial adviser, he should consider whether the fund is suitable for him. Past performance of the fund is not indicative of the future performance. Prices can go up and down. The value of the shares of the fund and the income accruing to them may fall or rise. Investors investing in a fund denominated in a non-local currency should be aware of exchange rate risk. The fund is not available to US citizens, residents or greencard holders.
