

UBS Infrastructure Equity Fund USD I-A1-acc

Fund Fact Sheet

UBS Sector Funds

Fund description

- This sector-based equity fund invests along the value chain of the global infrastructure opportunity set.
- The investment universe encompasses companies that provide the facilities and services necessary to maintain and develop modern infrastructure, and also includes companies supplying infrastructure-related products and services.

Name of fund	UBS (Lux) Infrastructure Equity Fund
Share class	UBS (Lux) Infrastructure Equity Fund I-A1-acc
ISIN	LU1692112649
Bloomberg ticker	CIFEEBU LX
Currency of fund / share class	USD/USD
Launch date	14.12.2017
Issue/redemption	daily
Swing pricing	yes
Accounting year end	31 May
Benchmark	MSCI World Core Infrastructure (NR) in USD
Distribution	Reinvestment
Management fee p.a.	0.730%
Ongoing costs p.a. ¹	0.97%
Name of the Management Company	UBS Asset Management (Europe) S.A., Luxembourg
Fund domicile	Luxembourg
SFDR Alignment	Art.8

¹ As at 14.04.2026, without transaction costs

Fund Statistics

Net asset value (USD, 31.07.2026)	2 244.66
Last 12 months (USD) – high	2 355.52
– low	1 987.10
Total fund assets (USD m)	304.44
Share class assets (USD m)	38.02

Performance (basis USD, net of fees)¹

Past performance is not a reliable indicator of future results. If the currency of a financial product, financial service or its costs is different from your reference currency, the return and/or costs can increase or decrease as a result of currency fluctuations.

in %	1 year	3 years	5 years	Ø p.a. 3 years	Ø p.a. 5 years

Risks

UBS Thematic Funds invest in equities and may therefore be subject to high fluctuations in value. As these UBS Funds pursue an active to very active management style, each Fund's performance can deviate substantially from that of its reference index. Focusing intentionally on specific themes and trends may entail additional risks. All investments are subject to market fluctuations. Every Fund has specific risks, which can significantly increase under unusual market conditions. The fund can use derivatives, which may result in additional risks (particularly counterparty risk). This Fund may not be appropriate for investors who plan to withdraw their money before the recommended holding period disclosed in the PRIIPs KID, if available for this share class. Sustainability risks are environmental, social or governance events or conditions that can have a material negative effect on the return, depending on the relevant sector, industry and company exposure. Sustainability risk: the risk arising from any environmental, social or governance events or conditions that, were they to occur, could cause a material negative impact on the value of the investment.

UBS Infrastructure Equity Fund USD I-A1-acc

Your capital is at risk. The value of an investment may fall as well as rise and you may not get back the original amount. Please note that additional fees (e.g. entry or exit fees) may be charged. Please refer to your financial adviser for more details. Investors should read the Key Information Document, Prospectus and any applicable local offering document prior to investing and to get complete information of the risks. Investors are acquiring units or shares in a fund, and not in a given underlying asset such as building or shares of a company. For a definition of financial terms refer to the glossary available at www.ubs.com/am-glossary.

For marketing and information purposes by UBS. For professional clients / qualified investors only. UBS funds under Luxembourg law. Arrangements for marketing fund units mentioned in this document may be terminated at the initiative of the management company of the fund(s). Before investing in a product please read the latest prospectus and key information document or similar legal documentation carefully and thoroughly. Any decision to invest should take into account all the characteristics or objectives of the product as described in its prospectus, or similar legal documentation. Investors are acquiring units or shares in a fund, and not in a given underlying asset such as building or shares of a company. The information and opinions contained in this document have been compiled or arrived at based upon information obtained from sources believed to be reliable and in good faith, but is not guaranteed as being accurate, nor is it a complete statement or summary of the securities, markets or developments referred to in the document. Any Index referenced in this document is not administered by UBS. Members of the UBS Group may have a position in and may make a purchase and / or sale of any of the securities or other financial instruments mentioned in this document. Units of UBS funds mentioned herein may not be eligible for sale in all jurisdictions or to certain categories of investors and may not be offered, sold or delivered in the United States. The information mentioned herein is not intended to be construed as a solicitation or an offer to buy or sell any securities or related financial instruments. Past performance is not a reliable indicator of future results. The calculated performance takes all costs on the product level into consideration (ongoing costs). The entry and exit costs, which would have a negative impact on the performance, are not taken into consideration. If whole or part of the total costs to be paid is different from your reference currency, the costs may increase or decrease as a result of currency and exchange rate fluctuations. Commissions and costs have a negative impact on the investment and on the expected returns. If the currency of a financial product or financial service is different from your reference currency, the return can increase or decrease as a result of currency and exchange rate fluctuations. This information pays no regard to the specific or future investment objectives, financial or tax situation or particular needs of any specific recipient. Future performance is subject to taxation which depends on the personal situation of each investor and which may change in the future. The details and opinions contained in this document are provided by UBS without any guarantee or warranty and are for the recipient's personal use and information purposes only. This document may not be reproduced, redistributed or republished for any purpose without the prior written permission of the relevant UBS management company or the relevant local UBS entity responsible for distribution, as applicable. Source for all data and charts (if not indicated otherwise): UBS Asset Management. A summary of investor rights in English can be found online at www.ubs.com/funds-regulatoryinformation. More explanations of financial terms can be found at www.ubs.com/am-glossary. The product described herein aligns to Article 8 Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector. Information on sustainability-related aspects pursuant to that regulation can be found on www.ubs.com/funds. This document contains statements that constitute "forward-looking statements", including, but not limited to, statements relating to our future business development. While these forward-looking statements represent our judgments and future expectations concerning the development of our business, a number of risks, uncertainties and other important factors could cause actual developments and results to differ materially from our expectations. **Luxembourg:** Prospectuses, key information document (KID) where applicable, the articles of association or the management regulations as well as annual and semi-annual reports are available for the purpose of inspection and obtaining copies thereof in a language required by the local applicable law free of charge at UBS Asset Management (Europe) S.A., 33A avenue J.F. Kennedy, 1855 Luxembourg and online at www.fundinfo.com. © UBS 2026. The key symbol and UBS are among the registered and unregistered trademarks of UBS. All rights reserved.

ESG Report

Terms used within this document do not refer to or relate to any regulatory definitions or provisions. Where applicable, a country-specific notice is provided in this document and must be read in conjunction with the factsheet.

ESG is an abbreviation for Environmental, Social and Governance (factors). These factors are used to evaluate companies and countries on how advanced they are with respect to sustainability. Once sufficient data on these factors are available, they can be used to assess and compare assets and also to inform the investment process when deciding what assets to buy, hold or sell.

Effective from Q2 2026, UBS Asset Management has updated its methodology to scaling carbon emissions metrics by applying a portfolio-level approach instead of an asset-level, excluding derivative exposures and considering long-only portfolio exposure.

ESG Criteria & Performance

The following illustrations show the fund's performance against ESG criteria that are either explicitly part of the fund's ESG characteristics and/or objectives or are included in the investment process. In addition to the specific ESG characteristics and/or objectives, the details of which can be viewed in the fund's legal documents, the following approaches are applied:

- ☒ Exclusion ☒ ESG Integration ☒ Voting ☒ Engagement program

For more information refer to the glossary. For details on specific ESG characteristics and/or objectives including exclusion thresholds or any other binding criteria, refer to fund's legal documents. Source: UBS Asset Management

Glossary

UBS AM sustainability approaches applied:

Exclusion: Strategies that exclude securities from funds where they are not aligned to an investor's values. Includes customized screening criteria. Subject to certain activities and threshold limitations. For details please refer to fund's legal documents.

ESG Integration: Strategies that integrate environmental, social, and governance (ESG) factors into fundamental financial analysis to improve the risk/return profile. This approach may have limited or no impact on portfolio composition. However, where fund-specific exclusions exist in relation to ESG integration or sustainability profile risks, as set out in the fund's legal documents, these may lead to divestment and/or a reduced position size within a portfolio.

Voting: Voting refers to how UBS Asset Management exercises proxy voting rights to act in the best financial interests of clients and support long term value creation. We promote strong corporate governance and responsible business practices in the companies in which we invest on behalf of our clients. Our approach is guided by our internal standards as outlined in the latest UBS Asset Management Corporate Governance & Proxy Voting Policy. This is not an indication that voting on sustainability-related topics has taken place with respect to companies in this portfolio during any given time period.

Engagement program: We regard engagement to be a two-way mutually beneficial dialogue with an issuer / company, with the objective to share information, enhance understanding and help to improve business practices and performance. The issuers / companies we engage with are selected from across the universe in which UBS Asset Management invests using a top-down approach in accordance with our principles, as outlined in our stewardship approach. This is not an indication that sustainability-related engagement has taken place with respect to issuers / companies in this portfolio during any given time period or that issuers / companies in this portfolio were chosen with the goal to actively engage. Information on UBS Asset Management's selection of issuers / companies, engagement activities, prioritization process and understanding of concerns can be found in the UBS Asset Management Stewardship Annual Report and in our stewardship approach.

ESG score (UBS Blended ESG Score*): The UBS Blended ESG Score is based on UBS-internal and independent external ESG data sources. The UBS Blended ESG Score is industry-adjusted and measured on a scale from 0 (lowest/worst score) to 10 (highest/best score). The metric is scaled up to 100% if actual data coverage is above the defined thresholds – fixed income: 50%, equities: 67%, multi-asset: 50%. Otherwise, the metric is reported as "-".

Classification system to separate corporate and sovereign issuers: Bloomberg Barclays Methodology. Securitized bonds are excluded from the calculation. "No exposure" if the fund is not invested in the respective issuers for the month. Disclosures required under Regulation (EU) 2024/3005 (the 'EU ESG Ratings Regulation') are available on our website: ->

[link](#)

*more details available at this [link](#)

Business activities and norms check: Controversial Business Involvement exposure is the exposure to companies with a revenue share exceeding a certain threshold of the respective field (production). Link to our Approach to Exclusion for more details: -> [link](#)

MSCI ESG scores are provided by MSCI ESG Research and are measured on a scale from 0 (lowest/worst score) to 10 (highest/best score). The individual MSCI E-, S-, and G-score indicates the resilience of issuers to environmental, social or governance related risks that are most material to an industry. The aggregated MSCI ESG score is based on these MSCI E-, S-, and G-scores but normalizes them relative to industry peers. This leads to a weighted average industry-adjusted MSCI ESG score which is comparable across industries. The metric is scaled up to 100% if actual data coverage is above the defined thresholds – fixed income: 50%, equities: 67%, multi-asset: 50%. Otherwise, the metric is reported as "-". More details available at this [link](#).

Weighted average carbon intensity – corporate issuers/ carbon-intensive sovereign issuers: These metrics measure a fund's exposure to carbon-intensive companies and governments. These metrics provide an insight into potential risks related to the transition to a lower-carbon economy, because companies with higher carbon intensity are likely to face more exposure to carbon related market and regulatory risks. These metrics are applicable across asset classes. It is the sumproduct of the fund weights and individual carbon intensities (carbon emissions scope 1+2 / USDm sales or GDP). The metric is scaled up to 100% if actual data coverage is above the defined thresholds – fixed income, 50%; equities: 67%, multi-asset: 50%. Otherwise, the metric is reported as "-". Classification system to separate corporate and sovereign issuers: Bloomberg Barclays Methodology. Securitized bonds are excluded from the calculation. "No exposure" if the fund is not invested in the respective issuers for the month. More details available at this [link](#).

MSCI ESG Fund Ratings are designed to measure the environmental, social and governance (ESG) characteristics of a fund's underlying holdings, making it possible to rank or screen mutual funds and ETFs on a AAA to CCC ratings scale. More details available at this [link](#).

Carbon footprint: Expresses the greenhouse gas footprint of an investment sum. The carbon emissions scope 1 and 2 are allocated to investors based on an enterprise value (including cash) ownership approach and are normalized by the current fund value. The carbon footprint is a normalized measure of a fund's contribution to climate change that enables comparison with a benchmark, between funds and between individual investments. The metric is total carbon emissions expressed as per currency invested. The metric is scaled up to 100%, if actual data coverage is

UBS Infrastructure Equity Fund USD

ESG Report

above the defined thresholds – fixed income: 50%, equities: 67%, multi-asset: 50%. Otherwise, the metric is reported as "-".

Classification system to separate corporate and sovereign issuers: Bloomberg Barclays Methodology. Securitized bonds are excluded from the calculation. "No exposure" if the fund is not invested in the respective issuers for the month.

Aggregation of ESG/carbon data: ESG scores of holdings in the portfolio and the reference index are aggregated based on their respective individual weights and ESG scores (sumproduct).

Fund of funds investments, derivatives and cash: Fund of funds investments used in the portfolio are treated on a lookthrough basis, whereby the economic exposures is allocated to the underlying securities held by these funds, and is treated as if it were a direct investment in those individual securities. These may lead to minimal exposures to securities that are excluded from direct investments. Derivative instruments within the portfolio, whether held directly or via fund of funds investments, are excluded from carbon metrics and other calculations. As a result, derivatives have no effect on the reported metrics. Portfolios for which we report the sustainability metrics may include cash positions, these are

however excluded from any calculations. Exclusively long-only portfolio exposure is considered. The information disclosed in this report, in particular the treatment of derivatives and cash, may or may not correspond with the investment characteristics of the fund and how the fund is managed. The sustainability metrics in this report may therefore differ from other UBS reports produced on the same date.

Active ESG: Benchmark selection is driven by portfolio implementation considerations, in particular to closely reflect the financial objectives of the fund. For actively managed strategies, a traditional benchmark is generally selected to provide a broad investment universe to which active management is applied. This enables an assessment of the magnitude of ESG improvements against the traditional benchmark and allows the costs and benefits of investing sustainably to be assessed.

The **Morningstar Sustainalytics Portfolio ESG Risk Rating** helps investors see how mutual funds and ETFs are meeting environmental, social, and corporate governance (ESG) challenges. The rating is given as 1 to 5 "globes," with more globes indicating lower ESG risk. Notably, the number of globes a fund receives is determined relative to other funds in the same Morningstar Global Category.

Important information about sustainable investing strategies

Sustainable investing strategies aim to consider and incorporate environmental, social and governance (ESG) factors into investment process and fund construction. Strategies across geographies and styles approach ESG analysis and incorporate the findings in a variety of ways. Incorporating ESG factors or sustainable investing considerations may inhibit UBS's ability to participate in or to advise on certain investment opportunities that otherwise would be consistent with the Client's investment objectives. The returns on a fund consisting primarily of sustainable investments may be lower or higher than funds where ESG factors, exclusions, or other sustainability issues are not considered by UBS, and the investment instruments available to such funds may differ. Companies, product issuers and/or manufacturers may not necessarily meet high performance standards on all aspects of ESG or sustainable investing issues.

Reconciliation of Assets under Management (AuM)

This report does not contain reconciled AuM positions, it only takes in consideration positions with settlement date as of report date. This means that traded but not settled positions are not included. Therefore, AuM figures in this report may differ from other UBS reports produced on the same date.
